EDUCATION

Computer Engineering, University of Valladolid
Introduction to React with Typescript, React Native and Vue, In company (by Cle Formación)
Developing ASP.NET MVC 4 web applications, Microsoft Virtual Academy
Web API design, Microsoft Virtual Academy
Redis, Microsoft Virtual Academy
MEAN stack, Microsoft Virtual Academy

PROFESSIONAL EXPERIENCE

Net4Things - .NET developer (01/2019 - 05/2019)
Solutio - .NET developer (09/2018 - 11/2018)
eldiario.es - Lead .NET developer + Project manager (07/2017 - 07/2018)
eldiario.es - .NET developer (09/2016 - 06/2017)
Miss Tipsi - .NET developer (03/2016 - 08/2016)
Dooflow - .NET developer (10/2014 - 06/2015)
Intelygenz - Java + .NET developer (09/2009 - 09/2014)
ALS - Optimyth - Internship + Java developer (10/2007 - 01/2009)
SEIO - Freelance Java (06/2007 - 09/2007)

SKILLS

C#   .NET Core   ASP.NET Core Web API   Entity Framework Core   Azure webjobs
Azure functions   XUnit + NSubstitute   Linq   SQL   SQL Server   Visual Studio 2017
Team Foundation Server (TFS)   Design patterns   SOLID
Dapper   Automapper   Git   iTextSharp   Scrum + XP

LANGUAGES

Spanish, native.
English, both spoken and written, high.

NET4THINGS

.NET developer (01/2019 - 05/2019)

PROJECTS

• Data export process for BI usage.

• Data import process for user creation.

• Bug fixing, development of new functionalities.

ROLES

• Development.

TECHNOLOGY

C#   SQL   Maria DB   Visual Studio 2017   Git

SOLUTIO

.NET developer (09/2018 - 11/2018)

PROJECTS

• Completing the development of an application for student and teacher managemente for
  Institución Educativa SEK.

ROLES

• Development.

TECHNOLOGY

C#   ASP.NET Core   Entity Framework   Linq   SQL   Azure webjobs   SQL Server
Visual Studio 2017   Git

.NET developer (09/2018 - 11/2018)

ELDIARIO.ES

Lead .NET developer + Project manager (07/2017 - 07/2018)

PROJECTS

• Development of a CRM.

ROLES

• Development.

• Project manager.

    • Taking decisions about architecture and development.

    • Management of the tasks for both the front and back teams.

    • Demos, planification, reporting to the stakeholders.

TECHNOLOGY

C#   ASP.NET Core Web API   Entity Framework Core   Dapper   Linq   SQL
XUnit + NSubstitute   Azure webjobs   Azure functions   SQL Server   Visual Studio 2017
Git

ELDIARIO.ES

.NET developer (09/2016 - 06/2017)

PROJECTS

• Development of a CRM.

ROLES

• Development.

• Support for the project manager.

- First definition of the database and architecture of the application.
- Management of the tasks assigned to the backend team.

TECHNOLOGY

C#   ASP.NET Core Web API   Entity Framework Core   Dapper   Linq   SQL
XUnit + NSubstitute   Azure webjobs   Azure functions   SQL Server   Visual Studio 2017
Git

MISS TIPSI

.NET developer (03/2016 - 08/2016)

PROJECTS

• Miss Tipsi, a POS (point of sale) system with a management module.
• Real time module. A messaging system to update (almost in) real time the cloud database with the locals' data.
• Web dashboard to monitor and interact with the state of the real time module. Apart from monitoring can inspect, recover or delete the deadlettered messages.
• Webapi for the integration of a mobile payment method.

ROLES

• Development.

TECHNOLOGY

C#   ASP.NET Web API   Entity Framework   Dapper   Linq   SQL   Unity
Rhino Mocks   NUnit   Windows services   Azure topics / subscriptions   Azure webjobs
SQL Server   Visual Studio   Team Foundation Server (TFS)
Bootstrap   AngularJs   HTML5 + CSS3

DOOFLOW

.NET developer (10/2014 - 06/2015)

PROJECTS

• SemMiner, a tool that analyses the competition and efficiency of marketing campaigns.

• Tools for internal use. ie: web directory, a dashboard to monitor the state of SemMiner.

ROLES

• Analysis and design.

• Development and layout.

TECHNOLOGY

C# + VB.NET   ASP.NET MVC   Entity Framework   Linq   SQL   Telerik KendoUI
Bootstrap   JQuery + Javascript   Ajax + JSON   HTML5 + CSS3   SQL Server
Visual Studio   Team Foundation Server (TFS)

INTELYGENZ

Java + .NET developer (09/2009 - 09/2014)

PROJECTS

Short and long-term project for various sectors and clients. The most remarkable:
- Financial sector: Flash desktop, SWOT and dashboard tools (BBVA), intranet, extranet, document management system (BSCH and Ahorro Corporación).
- Real estate: Tool for online valuations (iValoraciones).
- Automotive industry: Support, development and migration (from Access to Oracle) of a sales application (BMW MotoPS), extension of a car configurator (SsangYong).
- Tourist sector: Flash application using google maps for tourist routes (Tricanarias).

ROLES

- Both backend and frontend development.
- Dealing with the client.
- Development of a C# + Javascript framework as an extension of the company's framework, optimized for the BBVA's projects.
- Modification of HighCharts.js to adapt it to the needs of the project.
- Analysis and estimation.
- Casual substitution of the Project Owner and support for the Team Leader in management and organization tasks.
- Mentor of multiple new employees.
- Jump start training on the BBVA framework reused in another project.
- C# training for the team.
- Pair-programming and code improvement sessions.

TECHNOLOGY

C#   Linq   SQL   JQuery + Javascript   Ajax + JSON   HTML + CSS   Bootstrap
Visual Studio   SQL Server   Tortoise SVN   iTextSharp
Java   MySQL   Oracle   Sharp Develop   Intelli J   IIS   Tomcat   ActionScript 3
Visual Basic 6   Flash Develop   Google Maps + Street View APIs
Jasper Reports + iReport   nutch   Asana   Trello   Redmine   Pivotal Tracker
Windows + Unix   Scrum + XP

ALS - OPTIMYTH

Internship + Java developer (10/2007 - 01/2009)

PROJECTS

- ChecKing, a web dashboard based on internal and open source third party tools that analyses applications and source code and obtains data about unit tests, load tests and the compliance of some best practices associated with the language.
- QaKing, the stand alone version dedicated exclusively to the compliance of the best practices.
- DevKing, an Eclipse / WASD plugin version of QaKing.

ROLES

- Creation of complete packs of static analysis for multiple languages (ie: Cobol, SQL, Abap, JCL, Natural...)
  - Create or improve the grammar for the given language, as a base for the parser.
  - Compilation of best practices for the language.
  - Create rules that check those best practices.
  - Weekly reports of performance and efficiency of the analysis process.
- Development, extension, testing and support of ChecKing, QaKing and DevKing.
- Analysis of user stories.

TECHNOLOGY

Java   JavaCC   JUnit   Ant   Eclipse   CVS   Jira   Confluence   SOLID
Design patterns
SQL   MySQL   SQL Server   Oracle   Spring   MyBatis   Groovy   Java Swing
XML   Javascript   Ajax + JSON   HTML + CSS   Tomcat   Windows + Unix
Scrum + XP

SEIO

Freelance Java (06/2007 - 09/2007)

PROJECTS

Development of a CD application for the attendees of the SEIO Congress 2007 with a search tool for the documents of the conferences.

ROLES

• Dealing with the client.
• Requirement elicitation.
• Design and development.
• Partial modification of JPedal source code (current iText).

TECHNOLOGY

Java   Java Swing   SQL   Javascript   HTML + CSS   Eclipse   HSqlDb   JPedal
